

The University of California, Los Angeles requires that all incoming students provide documentation of vaccination or immunity to mumps, measles, rubella, tetanus, pertussis, meningococcal, varicella, and screening for tuberculosis, consistent with guidelines of the American College Health Association, California Department of Public Health, and the CDC.

All incoming UC students are <b>REQUIRED</b> to obtain these vaccines and undergo Tuberculosis screening	
Required Vaccination	Doses
Measles, Mumps and Rubella (MMR)	2 doses; first dose on or after 1st birthday.
Varicella (chickenpox)	2 doses; first dose on or after 1st birthday.
Tetanus, Diphtheria and Pertussis (Tdap)	1 dose after age 7
Meningococcal conjugate-- (Serogroups A, C, Y, & W-135)	Only for students age 21 years or younger, 1 dose on or after age 16
Screening for Tuberculosis	All incoming students who are at higher risk for TB infection should undergo either skin or blood testing for TB infection within 6 months prior to entry to UCLA. (Higher risk includes travel to or living in South & Central America, Africa, Asia, Eastern Europe, and the Middle East; prior positive TB test; or exposure to someone with active TB disease.) .

**UCLA STRONGLY RECOMMENDS THE FOLLOWING GROUPS OF STUDENTS ALSO BE VACCINATED AGAINST:**

- Human papillomavirus vaccine (for women and men through age 26 years)
- Hepatitis B vaccine (all students regardless of age)
- Meningococcal conjugate (students up to age 23)
- Meningococcal B (ages 16-23 who elect vaccination after discussion with their healthcare provider)
- Influenza vaccine (annual; all students regardless of age)
- Hepatitis A vaccine (all students regardless of age)
- Pneumococcal vaccine (for students with certain medical conditions e.g., severe asthma, diabetes, chronic liver or kidney disease)
- Poliovirus vaccine (if series not completed as a child)
- Vaccines for international travel, based on destination
